SKILLS

- Python
- MySQL
- Mongo-DB
- Tableau
- Git-hub
- ML
- AI (deep learning)
- OpenCV
- Azure
- Cloud Computing

LANGUAGES

- English
- Kannada
- Telugu

Graduation

- Vemana institute of technology (Mechanical Engineering)

Graduation	Percentage	Passed year
B.E.	74.49	2022

EXPERIENCE

- **Data science trainee** in INSOFE through **Turingminds.ai**
- PGP between February-2022 to Present in **INSOFE**

INTERNSHIPS

1. **Electric vehicles assembly**
I have learnt Assembly of cars, vans, autos, etc.
2. **Implementing lasso regression from scratch without using sklearn packages**

Using sklearn implemented the lasso regression algorithm and without sklearn packages implemented the lasso regression.

PROJECTS

Mechanical project

- **Studies on impact energy absorption of 3D printed lattice structure**

Lattice Structures were made using composite materials through 3D printing technology. Compressed the materials using compression machine to study the behaviour of the material and also tested using Weighted machine and compared the results.

Data science projects

- **End to end project on car price prediction**
Predicted car price using algorithms.
- **Project on bike price prediction**
Predicted bike price using dataset in bike-dheko.
- **Project on Titanic Survival prediction**
Predicted Survived on the titanic dataset.
